

# AWS ASSOCIATE

Learn | Research | Innovate

Career Guidance from Cyber  
Security Expert : Mohit Yadav

## COURSE DESCRIPTION

Architecting on AWS is designed to build the foundations of IT infrastructure on AWS. This course will help architects in optimizing the usage of AWS cloud by getting to know about AWS services and how these services complement the cloud-based solutions. Architectural solutions usually differ for different industries, sizes of businesses, and types of apps involved, and AWS provides the best cloud practices and designs for helping students think about the entire process of architecture. This course includes case studies to give them real-time problems exposure and let them know the approach they should follow. Hands-on experience is given to build a variety of infrastructures.

## AWS Associate Course Contents

Module 01: Design Resilient Architectures  
Module 02: Design High-Performing Architectures  
Module 03: Design Secure Applications and Architectures  
Module 04: Design Cost-Optimized Architectures

## Course Highlights

Course Duration :  
60 Hours

Language :  
Hindi | English

Delivery Methods :  
Classroom Training |  
Online Training

Duration of Program  
> 30 Days (2 Hours per Day )  
> 15 Days (4 Hours per Day)  
> 12 Days (5 Hours per Day)  
> 5 Days (12 Hours per Day)

Complete Study material and  
required Software & certification  
will be provided during the  
course.

CRAW  
Security

## WHAT CRAW SECURITY PROVIDES

We will provide you with the best curriculum with in-depth information possessing industrial secrets and experienced facts from our well-qualified and experienced teaching faculties and mentors.

Our main focus is to give long-lasting learning experiences to our students with cost-efficient prices to almost every financial section of society covering a national-level campaign to literate students hailing from any part of the world.

For ensuring a better Cyber World in the market for numerous IT organizations, we have developed a "1 Year Diploma in Cyber Security" comprises Basic Networking, Linux Essentials, Python Programming, Ethical Hacking, Advanced Penetration Testing, Cyber Forensics Investigations, Web Application Security, Mobile Application Security, Internet of Things (IoT) Pentesting, End Point Security, AWS Associate, and AWS Security. Enroll yourself today!
