MOHIT YADAV

Director

Training Alone Is Not Enough

Employers agree that you need a certification to validate your skills. 88% of employers believe it's important to give test after training to confirm knowledge gains.

98%

cite at least one specific benefits of certification testing rather than training by itself, such as:

- Better validation of knowledge learned / skills.
- Increased value / credibility of the training.
- Increased / improved knowledge.
- Demonstration of abilities.
- Skills and knowledge retained for a longer period of time.

97% of employers value certification enough to provide support for IT employees obtaining IT certification.

OFFERING SERVICES

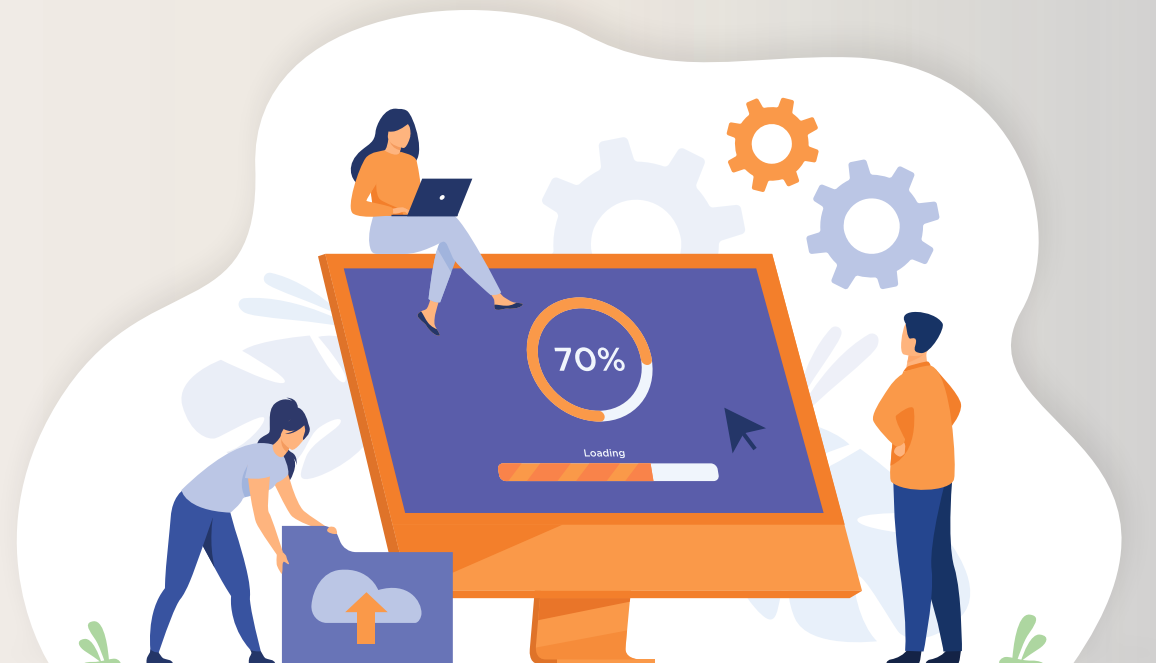

HOW ARE WE HELPING OUR CLIENTS

Craw Security Deals with various kinds of products like It Infrastructure Implementation Security Implementations, Security Audits, Vulnerability Assessments and Penetration Testing.

SECURITY CONSULTING Services

Vulnerability assessments and penetration testing meet two distinct objectives, usually with different results within the same area of focus. Vulnerability assessments tools. Discover which vulnerabilities are present, but they do not differentiate between exploitable flaws & innocuous ones. Penetration tests attempt to utilize the vulnerabilities in a system determine if any unauthorized access or other malicious activity is possible and identify the threats.
